

C. Deliverables / Output

Submit the following in a Word or PDF file:

1. Screenshot of your AWS Console home page

2. Descriptions of each service (EC2, S3, IAM):

- What is the service for?
- What can you do with it?

Elastic Cloud Compute (EC2)

- Provides resizable compute capacity in the cloud. With EC2, you can run applications, manage workloads, and scale infrastructure on demand in virtual computers / instances.

Simple Storage Service (S3)

- A cloud-based object storage service, allowing users to store and retrieve any amount of data. Common use cases of S3 include storage of files, images, or videos used in web applications.

Lambda

- A serverless, event-driven compute service. Unlike EC2, developers running their applications on Lambda do not have to worry about provisioning or managing servers. Common usage for Lambda includes modern web application frameworks like NextJS, that allows for deployment via serverless functions.

Identity Access Management (IAM)

- A service that enables you to securely control access to AWS resources. It allows users to manage who can access (authentication), as well as what actions they can do (authorization). This is used commonly in organizations with multiple people managing the AWS resources.

3. Screenshot of your Billing Dashboard (showing Free Tier status or no charges)

The screenshot displays the AWS Billing and Cost Management dashboard. The left sidebar contains navigation links: Home, Getting Started, Billing and Payments, Bills, Payments, Credits, Purchase Orders, Cost and Usage Analysis, Cost Explorer, Cost Explorer Saved Reports, Cost Anomaly Detection, Free Tier, Data Exports, and Customer Carbon Footprint Tool. The main content area shows a notification for the Free Tier status, indicating that the account does not get charged and credits cover the costs. It also shows the credits remaining (\$100.00 USD) and the days remaining (185 days). Below this, the 'Bills' section is visible, showing the 'AWS bill summary' for the billing period of August 1 - August 31, 2025. The summary indicates that there is no data to display for the current period, resulting in an estimated grand total of USD 0.00.
